Journal of Biochemical and Biophysical Methods, 21 (1990) 351–353
Elsevier

Contents to Volume 21

No. 1

Research Articles

J.S. Tyagi and I. Pastan (U.S.A.)
Purification of calf thymus RNA polymerase II for in vitro transcription studies 1

H.N. Subramaniam and K.A. Chaubal (India)
Evaluation of intracellular lipids by standardized staining with a Sudan black B fraction 9

H.N. Subramaniam and K.A. Chaubal (India)
Effect of γ-irradiation on lipid content and survival of Human Amnion cells in culture 17

M.J. Costas, R.M. Pinto, A. Fernández, J. Canales, J.A. García-Agúndez and J.C. Cameselle (Spain)
Purification to homogeneity of rat liver dinucleoside tetraphosphatase by affinity elution with adenosine 5′-tetraphosphate 25

P. Aroca, F. Solano, J.C. García-Borrón and J.A. Lozano (Spain)
A new spectrophotometric assay for dopachrome tautomerase 35

P.R. Jungblut and R. Seifert (F.R.G.)
Analysis by high-resolution two-dimensional electrophoresis of differentiation-dependent alterations in cytosolic protein pattern of HL-60 leukemic cells 47

Short Notes

H. Ashihara, N. Yabuki and K. Mitsui (Japan)
A high-performance liquid chromatography method for separation of purine bases, nucleosides and ureides: application to studies on purine catabolism in higher plants 59

I. Hanukoglu (Israel)
Elimination of non-specific binding in Western blots from non-reducing gels 65

G. Desoye (Austria)
Measurement of non-specific binding by parallel or consecutive incubation procedures in receptor homogenates following tissue disintegrations by sonification 69

W. Nunomura, M. Hatakeyama and H. Hirai (Japan)
Purification of human C-reactive protein by immunoaffinity chromatography using mouse monoclonal antibody 75

Research Articles

G. Benga, V.I. Pop, O. Popescu and V. Borza (Romania)
On measuring the diffusional water permeability of human red blood cells and ghosts by nuclear magnetic resonance 87

M. Hanssens, M.J.N.C. Keirse, P.J. Lijnen, M.-J. Kucharski, C. Luyten and F.A. Van Assche (Belgium, The Netherlands)
Measurement of individual angiotensin peptides by HPLC-RIA 103

P.-L. Kam, T.-M. Huang, M.-S. Shiao, L.-J. Lin and G.-G. Chang (Republic of China)
Oxidation and cleavage of 3-aminopyridine adenine dinucleotide phosphate with periodate 115

W.S. Lewis and S.M. Schuster (U.S.A.)
Quantitation of immobilized proteins 129

A.Y. Tsygankov, Y.A. Motorin, A.D. Wolfson and D.B. Kirpotin (U.S.S.R.)
Adaptation of an HPLC system for transient-state enzyme kinetic experiments: pulse-flow method 145

R. Talibart, M. Le Hénaff, T. Bernard and H. Wróblewski (France)
Identification of bacterial periplasmic glycine betaine-binding protein after electrophoresis and affinity labeling 155

M. Chiari, L. Pagani, P.G. Righetti, T. Jain, R. Shorr and T. Rabilloud (Italy, U.S.A., France)
Synthesis of an hydrophilic, p*K* 8.05 buffer for isoelectric focusing in immobilized pH gradients 165

P.K. Sinha, M. Praus, E. Köttgen, E. Gianazza and P.G. Righetti (F.R.G., Italy)
Two-dimensional maps in the most extended (pH 2.5–11) immobilized pH gradient interval 173

Book Reviews 181

No. 3

Announcement from the Publisher iii

Research Articles

M.A. Sanzo (U.S.A.)
The use of competitive affinity chromatography for the isolation of proteins which promote transcription 185

E. Hilario, I. Romero and H. Celis (Mexico)
Determination of the physicochemical constants and spectrophotometric characteristics of the metallochromic Zincon and its potential use in biological systems 197

K. Takagaki, T. Nakamura, H. Kawasaki, A. Kon, S. Ohishi and M. Endo (Japan)
Determination of the reducing terminal sugars of glycosaminoglycans using 2-aminopyridine 209

U.R. Joss and L. Schleinkofer (Switzerland, F.R.G.)
Detection of radioactivity on microtiterplates in situ using a photon-counting imager 217

A. Cantisani, L. Napolitano, M.G. Giuffrida and A. Conti (Italy)
Direct identification and characterization of llama (*Lama glama* L.) whey proteins by microsequencing after Western blotting 227

353

K.-i. Nakamura, E. Masuyama, S. Wada and M. Okuno (Japan)
Application of stains-all staining to the analysis of axonemal tubulins: identification of β-tubulin and β-isotubulins 237

M. Tal, I. Weissman and A. Silberstein (Israel)
A new method for stoichiometric analysis of proteins in complex mixture – reevaluation of the stoichiometry of *E. coli* ribosomal proteins 247

No. 4

Research Articles
G.V. Gololobov, A.M. Shuster, I.K. Zalite, A.G. Gabibov and A.G. Rabinkov (U.S.S.R.)
Avidin-peroxidase: synthesis and HPLC isolation of highly sensitive oligomers 267

V.M. Mirsky, V.V. Cherny, V.S. Sokolov and V.S. Markin (U.S.S.R.)
Electrostatic assay of phospholipase A activity: an application of the second harmonic method of monitoring membrane boundary potentials 277

P. Antonov, R. Pancheva and M. Naplatarova (Bulgaria)
Membrane-related thermo-osmotic effect as measured by medium conductivity in isotonic cell suspensions 285

M. Mehrpouyan and W.S. Champney (U.S.A.)
A rapid method for the purification of RNA polymerase holoenzyme from *Escherichia coli* 289

S. El Ouggouti, A. Truskolaski, A. Bussel, D. Dhermy and O. Bertrand (France)
A low-cost automated device incorporating a hollow fiber filtration cartridge for large-scale production of ghosts from human erythrocytes 299

C. Glemarec, Á. Nyilas, C. Sund and J. Chattopadhyaya (Sweden)
A comparative conformational study of thymidylyl(3′ → 5′)-thymidine, thymidylyl(3′ → 5′)-5′-thio-5′-deoxythymidine and thymidinylacetamido-[3′(O) → 5′(C)]-5′- deoxythymidine 311

L.J. DeLong, C.M. Phillips, J.H. Kaplan, A. Scarpa and J.K. Blasie (U.S.A.)
A new method for monitoring the kinetics of calcium binding to the sarcoplasmic reticulum Ca^{2+}-ATPase employing the flash-photolysis of caged-calcium 333

B. Persson and D. Eaker (Sweden)
An optimized procedure for the separation of amino acid phenylthiohydantoins by reversed-phase HPLC 341
